PROFESSIONAL SUMMARY

Enthusiastic BCA graduate with strong skills in **Java, Spring Boot, and React**. Experienced in building full-stack applications with a focus on backend systems and dynamic front-end interfaces. Passionate about problem-solving, continuous learning, and contributing to impactful software projects.

EDUCATION

Pragjyotish College, Guwahati, Assam

Bachelor of Computer Applications (BCA) – Graduated: Aug 2025

SKILLS

- **Programming Languages:** Java (Proficient), C, C++ (Basic), JavaScript
- **Frameworks & Libraries:** Spring Boot (Backend), React (Frontend)
- **Databases:** MySQL (Relational Database Management)
- **Development Tools:** Maven, Git/GitHub, Postman

PROJECTS

Vechico – Vehicle Rental System

- Developed a full-stack web application for vehicle rentals using Java (Spring Boot), React, and MySQL.
- Features: Role-based access, vehicle management, booking requests, user authentication, and admin dashboards.
- Technical Highlights: Implemented DTO mappings, relational data models, and secure authentication mechanisms.

Progresso – Fitness Tracking App

- Built a full-stack fitness tracking application using React, Spring Boot microservices, and MySQL.
- Features: User authentication, workout and activity logging, progress visualization, and personalized fitness dashboards.
- Technical Highlights: Designed RESTful APIs, implemented JWT-based authentication, and integrated microservice architecture for scalability.

SneakVerse – Online Sneaker Store (In Progress)

- Designing a complete e-commerce platform for sneakers and trendy apparel.
- Frontend: React-based dynamic UI.
- Backend: Spring Boot with product catalog, shipping label generation, and order management.
- Future Scope: Payment gateway integration and automated invoices.
